# 12. Hollow Manor

Supernova Cup · upgrade blueprint · src/kart/tracks/manor.ts

## Where it is now

2.9 km: long drive, great hall ramp, roof jump to the graveyard, chapel or hedge maze, inlet leap or boardwalk, lake shore. Lap 2 storm; last lap ghosts.

## What is wrong

The house is a ramp you pass through once. It never changes.

## Core mechanic

The house changes. Doors slam shut to close routes and open others, so the route through the house is different every lap.

## Signature moments

- The great hall, then on lap 2 the floor collapses into the cellar: a new underground route.
- Portrait corridors where walls slide.
- The hedge maze, whose exits change each lap.

## Layout changes

- Make the house a network of 3-4 interior routes.
- Add the cellar route under the hall.
- Keep the drive, graveyard and lake.

## Lap changes

- Lap 2: storm and the floor collapse.
- Last lap: darkness; only headlights; ghosts block a door at a time.

## Engine work needed

- Routes that open and close during a race (doors).
- Collapsing floors.
- Rivals that re-route.

## Rivals

- Rivals choose open doors and react when one closes.

## Done when

- Laps of 50-60 s for a good driver; all 3-lap test races finish with no errors.
- Rivals use every route and the core mechanic, with no more than 2 rival falls per race.
- The core mechanic is in play for at least half the lap, not just one set piece.
- A blind test: a screenshot or a 10-second clip of this track could not be mistaken for any other track.
- Item rows are never on the start line; nothing solid blocks a road by accident.
